•Total square feet :
1605+ 1605 unfinished
basement

Our 2011 Parade Home is a great example of what we do for a customer. This home started as a pre-sold from the beginning. We help the customer find where they want to live, negotiate for the lot and choose a plan. Then we modify the existing floor plan to suit their taste and needs. Where you see that the most is in the kitchen and the dark natural stained trim. The exquisite kitchen is built along a curved wall with a large expanse of windows creating a beautiful look as well as providing a wonderful amount of light inside. The dark stained trim is a very natural accent. Finally we were not afraid to paint some accent walls that really help define the space. This beautiful home is a must see during the Parade of Homes!
